Symptom Checklist for Senior Cats
Please **CHECK** all that apply to your cat

Behavior/Neurologic

- My cat is just not acting like himself.
- My cat is not seeking much attention and interacts less with the family.
- My cat seems confused or disoriented.
- My cat has been meowing for no apparent reason.
- My cat's sleeping patterns have changed.
- My cat has had tremors or episodes of shaking.
- My cat has displayed circling, head tilts or repetitive movements.

Heart/Lungs

- My cat has been coughing or sneezing.
- My cat seems to be panting.
- My cat tires more rapidly or seems short of breath.

Activity/Orthopedics

- I have noticed a change in my cat's activity level.
- My cat has difficulty jumping up to bed or counter.
- My cat seems lame or stiff and has difficulty rising from a resting position.
- My cat shows signs of pain (hiding, unusually quiet or vocalizing frequently).

Body Functions

- My cat has bad breath and/or red or swollen gums.
- My cat has difficulty chewing.
- My cat has gained or lost weight.
- My cat is drinking more water than usual.
- I have noticed a change in my cat's urine production.
- My cat's litter-box habits have changed and he/she sometimes has accidents.
- My cat's bowel habits have changed (increase frequency, diarrhea, constipation or straining).
- My cat vomits more than in the past.
- My cat seems to have trouble seeing.
- My cat seems to have trouble hearing.
- My cat is bumping into things.

Skin and Coat

- My cat scratches, licks, and/or chews excessively.
- My cat has changes in hair coat, skin or new lumps and bumps.
- My cat skin has an odor.
- I have noticed a change in my cat's grooming habits.
- My cat gets mats now.

Please tell us the specific questions you have about your cat: (Feel free to use the back of this page if needed).
