SURGICAL/ANESTHETIC AND MEDICAL CONSENT FORM
Feline Neuter

The following procedures will be performed today:

Pre-Anesthetic Testing – Because of our commitment to providing you with the highest quality of veterinary care, we require pre-anesthesia testing. Each surgical or anesthetic procedure has some risk involved. Advances in anesthesia have made routine procedures relatively safe, but occasional problems can occur due to pre-existing conditions not evident on physical examination. If there is any indication of an abnormality, we will either contact you before proceeding or take steps necessary to ensure the safe care of your pet.

HEALTH SCREEN I

This is the minimal required bloodwork for any healthy young pet undergoing an anesthetic procedure.

- ALT (liver)
- Creatinine (kidney)
- PCV (detects anemia)
- Platelet estimate (clotting ability)
- Total Protein (assesses hydration and protein level)

Anesthesia/Monitoring – respiration, blood oxygen level, EKG, temp, CO2 levels and blood pressure

Anesthesia – pre medication, IV and gas anesthesia

IV Catheter

Surgical Procedure - castration

Recovery Monitoring – including pain assessment

Hospitalization

Discharge Instructions

Total Cost: \$283
